INTRODUCTION

**THE MOST
COMPETITIVE
COMPACTOR & BALER
SUPPLIER IN THE FIELD**

With 30 Years experience in specialist waste and recycling equipment, IEG Compactors and Balers provide professional, non biased advice.

We include comprehensive cost analysis to enable our clients to decide on the right approach for recycling and disposal of commercial waste, all with the aim of minimising cost and maximise investment.

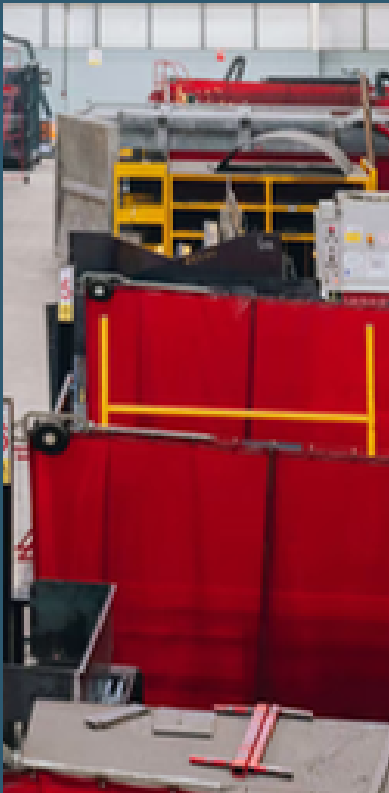

As the leading UK compactor and waste baler supplier we aim to support our clients with a backup service that is second to none.

MANUFACTURING

Our Barnsley site comprises of modern office layout and extensive factory premises making it one of the most modern facilities of its kind in the UK.

The team has been designing and building state of the art compaction and baling machinery for nearly 2 decades and continue to invest heavily in our bespoke units.

MAKES AND MODELS OF
COMPACTORS & BALERS**

NATIONWIDE COVERAGE

Our highly skilled Field Service and Maintenance engineers have extensive experience within the waste industry.

With unrivalled coverage and expertise, you can rest assured the IEG Service team can offer fast response times.

The highly qualified team look to provide first-time fixes to the waste equipment.

Whether its a machine purchased through IEG or existing equipment, you can guarantee unbeatable customer service both out in the field and at base.

THE *INTELLIGENT* COMPACTOR SERIES

SMART COMPACTION | BUILT FOR BUSINESS

**FULL ON-SITE REFURBISHMENT TO
CONTAINERS WITH NO EXTENSIVE BODY
DAMAGE**

This new generation of compaction equipment combines robust performance with cutting-edge IoT technology.

Designed for dry general waste across commercial and industrial settings, our equipment delivers high efficiency, lower costs, and full remote monitoring as standard.

At IEG, our goal is always to utilise our product expertise to make efficiencies in waste management that improve overall safety; The i Series embodies this approach, utilising digital telemetries that reduce human interaction, reduced site requirements and oil volumes.

Key Features

Fast cycle times	10% reduction in cycle time for quicker compaction
Economy mode	Reduce energy usage without compromising performance
High-volume charge box	Accommodates larger waste volumes with fewer loads
Heavy duty compaction	Minimise waste volume and maximise payloads
Adaptable design	Customisable to your site, workflow and waste streams

TOTAL VISIBILITY = TOTAL CONTROL

POWERED BY CLOUD-BASED DIAGNOSTICS

The built-in IoT platform brings your Compactor online. Gaining real-time insight and control to help you reduce downtime and streamline operations.

View - Live data, GPRS, Statistics, Wiring and Hydraulic diagrams, Fill levels, Graphical displays, Waste fractions, Service reports and Intervals

Remote diagnostics

Identify and resolve issues before they disrupt operations.

Live usage data

Track activity, cycle counts and container fill levels.

Automatic alerts

Receive notifications for container fill levels, service prompts and faults.

Data-driven insights

Improve planning and decision-making using actual usage trends

Why choose the 'i' Series?

Reduce waste collections

Fewer uplifts thanks to efficient compaction

Lower carbon footprint

Fewer vehicle movements and smarter usage

Operational efficiency

Less downtime, more control with real-time updates

Tailored functionality

Custom settings to suit your waste profile

Available on all NEW Vertical & Horizontal Balers and Portable/Static Compactors as standard

Automatic alerts

Remote diagnostics

Reduced power supply

Reduced sound pollution

GPRS

10% Reduction in cycle time

Live telemetry data

Environmentally friendly

Pressure sensing bin lift

Error feedback
